Um die Auffindung eines Namens zu erleichtern, wird in diesem Verzeichnis auf die Trapeze verwiesen, welche durch das ausgezogene Gradnetz gebildet und an den Rändern jeder Karte durch große Buchstaben und Zahlen bezeichnet sind. Die dem Namen zunächst stehenden Zahlen bezeichnen die Kartenseite des Atlas, die Buchstaben und die auf diese folgenden Zahlen das Trapez, welches den betr. Namen enthält. Die beiden Halbkugeln auf Tafel 3, denen die Namen der Meerestiefen entnommen sind, werden durch ⓐ und ⓑ bezeichnet; bei den Karten des Nord- und Südpols (Nr. 5 und 6) wird auf die durch die Längengrade gebildeten Trapezreihen verwiesen, welche durch Zahlen allein näher bezeichnet sind. Die Zeichen ⓐ, ⓑ, ⓒ usw. deuten auf die Nebenkarten hin. In den größeren Nebenkarten sind die Trapeze durch kleine Buchstaben bezeichnet.

Jeder Name eines Ortes, Flusses usw. ist im Verzeichnis nur einmal aufgenommen worden, und zwar ist der Name meistens derjenigen Karte oder Nebenkarte entnommen, in welchem der betr. Gegenstand im größten Maßstabe gezeichnet ist; die Namen von großen Gebirgen, Ländern, Meeren, Flüssen usw., welche sich über mehrere Karten oder viele Trapeze desselben Blattes ausdehnen, sind den Übersichtskarten entnommen. Ziffern und Buchstaben, durch welche auf einigen Karten, Raummangels wegen, Provinzen, Bezirke usw. bezeichnet sind, und für welche in den Erklärungen des betr. Blattes eine Erläuterung gegeben ist, sind mit dem Zeichen = den betr. Namen hinzugefügt worden. Namen, welche aus mehreren Worten bestehen, sind unter dem Eigennamen, nicht unter der Gattungsbezeichnung — z. B. Monte Rosa unter Rosa, Rio Negro unter Negro — aufgeführt. Die mit Saint, Sainte, San, Sankt, São, Santa, Santo zusammengesetzten Namen sind sowohl unter S, als auch nach dem Namen selbst aufgeführt. Die Namen sind, auch wenn sie im Atlas in den Endungen abgekürzt wurden, im Verzeichnis stets voll ausgeschrieben; nicht leicht verständliche Abkürzungen sind mit dem Zeichen = dem betr. Namen hinzugefügt worden.

Die von dem deutschen und lateinischen Alphabet abweichenden Buchstaben der nordischen, rumänischen, slawischen u. a. Sprachen, z. B. å, č, ł, ll, ñ, ø, rr, š, ţ, usw., sind nicht als besondere Buchstaben, sondern in der Reihenfolge des lateinischen Alphabets bei, a, c, l, n, o, r, s, t usw. eingeordnet worden. Namen, welche mit C oder c geschrieben werden, sind ev. bei K oder k nachzuschlagen, und umgekehrt.

Namen, bei welchen ein erklärender Zusatz sich nicht findet, bedeuten stets Orte (Städte, Dörfer, Gemeinden, Seriben, Kraals, Wohnplätze usw.); nur bei denjenigen Orten, deren Wortlaut eine abweichende Bedeutung hat, z. B. bei Zusammensetzungen mit Mount, Rio u. a., bei den Endungen berg, feld usw., ist stets die Erklärung *O.* = Ort hinzugefügt. Bei wiederholt vorkommenden Namen ist stets ein Zusatz, welcher die Lage des betr. Gegenstandes (nach Land, Provinz, Fluß, Gebirge usw.) genauer bestimmt, in Klammern hinzugefügt; bei gleichen Namen von Flüssen ist gewöhnlich der Name des Flusses, in welchen dieselben einmünden, als unterscheidendes Merkmal hinzugefügt. Für Erklärungen sind folgende leicht verständliche Abkürzungen angewendet worden:

a. = an, am, an der.
b. = bei, beim.
i. = in, im.
v = von, vom.
z. = zu, zum, zur.

To facilitate the finding of names, the reader is referred in the present index to the squares formed by the degrees of longitude and latitude and marked, on the border of each map, by capital letters and figures. The numbers placed next the names denote the page of the atlas, the letters with the following figures, refer to the square that contains the particular name. The maps of the two hemispheres (plate 3), from which the names of the ocean depths are taken, are distinguisted as ⓐ and ⓑ. In the case of the maps of the North Pole and the South Pole (5 and 6) the index refers to the plates of squares bounded by the degrees of longitude and marked only by numbers. The signs ⓐ, ⓑ, ⓒ, &c. denote the inset-maps, on the larger of which the squares are marked by small letters.

Each name of a place, river, &c. has been inserted only once in the index, in which the entry refers generally to the map or inset showing the particular object on the largest scale. Only the names of large chains of mountains, of large countries, seas, rivers, &c. which extend over several maps or over many squares of the same sheet, have been taken from the general maps. The numbers and letters by which, on account of want of room, provinces and smaller administrative divisions are denoted on some maps, on which the necessary explanation will be found, have been added to the names with the sign =. Names composed of several words, have always been inserted under the proper name, not under the noun appellative, e. g.: Monte Rosa, under Rosa; Rio Negro, under Negro. Names beginning with Saint, Sainte, San, Sankt, São, Santa, Santo, are entered under the letter S as well as under the second part of the name. Names entered on the maps with abbreviated terminations are all printed in full in the index, and abbreviations not readily understood have the sign = added to the corresponding full name.

The letters of the Scandinavian, Roumanian, Slavic and other languages which differ from the German and Latin alphabets, e. g., å, č, ł, ll, ñ, ø, rr, š, ţ &c., have not been allowed to affect the alphabetical arrangement, names containing these letters being entered in the same order as if the letters a, c, l, n, ö, r, s, t &c. Names containing the letter C or c, should, if not found under that, be looked for under K or k, and vice versa.

Names not accompanied by an explanatory addition, always denote places (towns, villages, communes, kraals, zeribas, &c.); but to compound place names one element in which has a meaning that would appear to indicate something else than a place, such as Mount, Rio &c., or berg = mountain, field, wood, &c. in terminations, the explanatory letter *O.* = Ort (place) has been added. When the same name is entered more than once a parenthesis is always added to distinguish the particular place, mountain, or whatever it may be, refered to in each case, and rivers having the same name are for the most part distinguisted by having the name of the river into which they flow so added. In such explanatory additions the following easily understood abbreviations have been employed:

a. = an (on, upon).
b. = bei (near).
i. = in (in, at).
v. = von (of).
z. = zu (to).
Bez. = Bezirk (District).
Bg = Berg (Mount, Mountain).
Bge = Berge (Mountains).
Bk = Bank (Sand-bank, Shelf).
Br. = Brunnen (Well, Fountain).
Bzkpt = Bezirkshauptmannschaft (Territory administered by a captain of district).
C. = Cap (Cape).
Col. = Colony.
Ct. = Canton.
Cty = County.
Dép. = Département (Department).
Dist. = District.
Dj. = Djebel, Jebel (Mountain, Hill).
Fl. = Fluß (River, Creek).
Ft. = Fort, Fortress.
Ftm = Fürstentum (Principality).
G. = Golf (Gulf).
Geb. = Gebirge (Mountains).
Ghztm = Großherzogtum (Grand-duchy).
Gouv. = Gouvernement (Government).
Gfsch. = Grafschaft (County).
Halb.-I. = Halbinsel (Peninsula).
Hztm = Herzogtum (Duchy).
I. = Insel (Island).
In = Inseln (Islands).
Kgr. = Königreich (Kingdom).
Kr. = Kreis (Circuit, District).
Kom. = Komitat (Comitat).
Krhpt = Kreishauptmannschaft (Territory administered by a captain of circle).
Ld = Land (Country).
Ldsch. = Landschaft (District).
MB. = Meerbusen (Gulf, Bay).
Mt = Mont, Mount, Mountains.
O. = Ort (Dwelling-place, town, village &c).
P. = Pass.
Prov. = Provinz (Province).
Q. = Quelle (Headwater, Spring).
Rep. = Republik (Republic).
Rgbz. = Regierungsbezirk (Government).
Ru. = Ruine (Ruins).
Terr. = Territorium (Territory).
U. St. = United States of America.
V. = Volk, Volksstamm (People, Tribe).
Wil. = Wilajet (Vilayet).

Pour faciliter la recherche des noms, nous renvoyons dans la présente nomenclature aux trapèzes formés par les degrés de longitude et de latitude et marqués sur le cadre de chaque carte par des lettres majuscules et des chiffres. Les chiffres placés en premier lieu après les noms indiquent la feuille de l'Atlas; les lettres avec les chiffres qui les suivent, se réfèrent au trapèze qui contient le nom respectif. Les deux hémisphères (feuille 3), qui contiennent les noms des profondeurs des mers, sont désignées par les signes ⓐ et ⓑ. Pour les cartes du pôle Nord et du pôle Sud (nos 5 et 6) la nomenclature renvoie aux files de trapèzes limitées par les degrés de longitude et marquées seulement par des chiffres. Les signes ⓐ, ⓑ, ⓒ, etc. désignent les cartes supplémentaires, sur les plus grandes desquelles les trapèzes sont marqués par des lettres minuscules.

Chaque nom d'endroit, de fleuve, etc. ne figure qu' une seule fois dans la nomenclature, et la désignation s'adapte à la carte, soit principale, soit supplémentaire, qui présente sur la plus grande échelle l'objet dont il s'agit; seulement les noms des grandes chaînes de montagnes, des grands pays, mers, fleuves, etc. qui s'étendent sur plusieurs cartes ou sur un grand nombre de trapèzes de la même carte, sont pris, pour leur désignation, sur les cartes générales. Les chiffres et les lettres qui, faute d'espace, indiquent sur quelques cartes, des provinces, des districts, etc., et dont l'explication est donnée sur ces cartes mêmes, ont été ajoutés aux noms respectifs par le signe =. Les noms composés de plusieurs mots ont toujours leur place sous le nom propre seul, et non pas sous le nom appellatif, p. e.: Monte Rosa, sous Rosa; Rio Negro, sous Negro. Les noms composés avec Saint, Sainte, San, Sankt, São, Santa, Santo se trouvent insérés et sous la lettre S et sous le nom même. Dans la nomenclature tous les noms, lors même que leurs terminaisons sont abrégées dans l'Atlas, sont écrits en toutes lettres. Les abréviations elles-mêmes, qui ne sont pas bien intelligibles, sont ajoutées aux noms par le signe =.

Les lettres des langues scandinaves, roumaine, slaves et autres qui diffèrent des alphabets allemand et latin, p. e.; å, č, ł, ll, ñ, ø, rr, š, ţ etc., ont été insérées non pas comme lettres particulières, mais dans l'ordre de l'alphabet latin, près des lettres a, c, l, n, o, r, s, t, etc. Les noms qui s'écrivent avec C ou c, doivent éventuellement être recherchés sous K ou k, et vice versa.

Les noms qui ne sont pas accompagnés d'addition explicative, désignent toujours des endroits (villes, villages, communes, zeribes, kraals, etc.); ce n'est qu'aux endroits dont le nom a une signification différente (citons p. e. les noms composés avec Mount, Rio etc. et les noms avec les terminaisons »berg« = mont, »feld« = champ etc.) que le signe explicatif *O.* = Ort (endroit) a été ajouté. Les noms conformes et semblables qui se présentent à plusieurs reprises, sont toujours pourvus d'une addition, entre parenthèses, qui précise (d'après le pays, la province, le fleuve, la montagne, etc.) la situation de l'objet respectif. Dans ce sens, la situation des fleuves est généralement précisée par l'indication des fleuves dont ils sont affluents. Comme additions explicatives les abréviations suivantes ont été employées:

a. = an (sur, à).
b. = bei (près de).
i. = in (en, dans, à).
v. = von (de).
z. = zu (à).
Bez. = Bezirk (District).
Bg = Berg (Mont, Montagne).
Bge = Berge (Montagnes).
Bk = Bank (Banc, Banc de sable).
Br. = Brunnen (Fontaine, Puits).
Bzhpt = Bezirkshauptmannschaft (Territoire administré par un capitaine de district).
C. = Cap.
Col. = Colonie.
Ct. = Canton.
Cty = County (Comté).
Dép. = Département.
Dist. = District.
Dj. = Djebel (Mont, Montagne).
Fl. = Fluß (Rivière, Fleuve).
Ft. = Fort, Forteresse.
Ftm = Fürstentum (Principauté).
G. = Golf (Golfe).
Geb. = Gebirge (Montagnes).
Ghztm = Großherzogtum (Grand-duché).
Gouv. = Gouvernement.
Gfsch. = Grafschaft (Comté).
Halb.-I. = Halbinsel (Presqu'île).
Hztm = Herzogtum (Duché).
I. = Insel (Ile).
In = Inseln (Iles).
Kgr. = Königreich (Royaume).
Kom. = Komitat (Comitat).
Kr. = Kreis (Cercle).
Krhpt = Kreishauptmannschaft (Territoire administré par un capitaine de cercle).
Ld = Land (Pays).
Ldsch. = Landschaft (Paysage, Pays).
MB. = Meerbusen (Golfe, Baie).
Mt = Mont, Mount, Mountains.
O. = Ort (Habitation, Ville, Village etc.).
P. = Paß (Défilé, Col, Passage).
Prov. = Provinz (Province).
Q. = Quelle (Source, Fontaine).
Rep. = Republik (République).
Rgbz. = Regierungsbezirk (Gouvernement, Régence).
Ru. = Ruine (Ruines).
Terr. = Territorium (Territoire).
U. St. = United States (États-Unis).
V. = Volk, Volksstamm (Peuple, Tribu).
Wil. = Wilajet (Vilayet).

Per facilitar la ricerca dei nomi, si rimanda nel seguente indice ai trapezi formati dai meridiani e dai paralleli, e segnati sui margini di ciascuna carta mediante lettere majuscole e cifre. Le cifre, che stanno vicine dopo i nomi, indicano la pagina dell' atlante; le lettere e le cifre, che le seguono, si riferiscono al trapezio che contiene il nome rispettivo. Le due emisfere (pag. 3) dalle quali derivano i nomi delle profondità del mare, sono segnate ⓐ e ⓑ. Riguardo alle carte delle regioni artiche ed antartiche (pagine 5 e 6) si indirizza alle file di trapezi confinate dai meridiani e segnate mediante cifre soltanto. I segni ⓐ, ⓑ, ⓒ ecc. si riportano alle cartine aggiunte. Nelle più grandi di queste cartine i trapezi sono segnati con lettere minuscole.

Ciascun nome di luogo, di fiume ecc. è dato una sola volta nell' elenco, ed è preso dalla carta principale o dalla secondaria sulla quale l'oggetto rispettivo è rappresentato in maggiore scala; i soli nomi delle regioni, delle grandi zone montagnose, dei mari, dei fiumi, che si estendono sopra parecchie carte o sopra molti trapezi di una carta, sono desunti dalle carte generali. Le cifre e le lettere, che su alcune carte, per mancanza di spazio, indicano province, distretti ecc., e la cui esplicazione è data sulle carte rispettive, sono aggiunte ai nomi con la spiegazione =. I nomi, che constano di parecchi vocaboli, sono sempre dati col nome proprio, e non con quello generico; così, ad esempio, Monte Rosa è a cercarsi sotto Rosa; Rio Negro, sotto Negro. I nomi composti con Saint, Sainte, San, Sankt, São, Santa, Santo si trovano tanto alla lettera S che sotto il nome stesso. I nomi, quand' anche siano abbreviati nell' atlante, sono sempre scritti con tutte le lettere nell' indice. Abbreviazioni non facili a comprendersi, venneri aggiunte al relativo nome col segno =.

Le lettere delle lingue nordiche, romanza, slave ed altre, che differiscono dagli alfabeti tedesco e latino, ad esempio: å, č, ł, ll, ñ, ø, rr, š, ţ ecc., sono state ordinate, non come lettere particolari, ma in ordine dell' alfabeto latino, appresso alle lettere a, c, l, n, ö, r, s, t ecc. I nomi, che si scrivono con C o con c, s'hanno, eventualmente, da cercare sotto la lettera K o k, e viceversa.

Quei nomi, presso i quali non si trova un' aggiunta esplicativa, indicano sempre luoghi, (città, villaggi, comuni, seribe, kraals e simili): soltanto accanto a quei luoghi il cui nome ha significato diverso (ad esempio le composizioni con Monte, Rio ecc., o i nomi che si terminano colle voci »berg« = monte, »feld« = campo) sempre si è posta la spiegazione *O.* = Ort (luogo, località). A nomi conformi, che si trovano più volte, si è sempre apposta, in parentesi, un' aggiunta per meglio determinar la posizione del relativo oggetto. A tale intento, presso i nomi uguali dei fiumi si trova l'indicazione del fiume del quale sono tributarii. Per le interpretazioni si fece uso delle seguenti abbreviature:

a. = an (su, sul, sulla).
b. = bei (presso, presso il).
i. = in (in, nel, nella).
v. = von (da, dal, dallo).
z. = zu (a, alla).
Bez. = Bezirk (Distretto).
Bg = Berg (Monte).
Bge = Berge (Monti, Montagna).
Bk = Bank (Banco, Banco di sabbia).
Br. = Brunnen (Fontana, Pozzo).
Bzhpt = Bezirkshauptmannschaft (Capitaneria distrettuale).
C. = Cap (Capo).
Col. = Colonia.
Ct. = Canton (Cantone).
Cty = County (Contea).
Dép. = Département (Dipartimento, Compartimento).
Dist. = Distrikt (Distretto).
Dj. = Djebel (Monte, Montagna).
Fl. = Fluß (Fiume).
Ft. = Fort, Festung (Forte, Fortezza).
Ftm = Fürstentum (Principato).
G. = Golf (Golfo, Baia).
Geb. = Gebirge (Montagna).
Ghztm = Großherzogtum (Granducato).
Gouv. = Gouvernement (Governo).
Gfsch. = Grafschaft (Contea).
Halb.-I. = Halbinsel (Penisola).
Hztm = Herzogtum (Ducato).
I. = Insel (Isola).
In. = Inseln (Isole).
Kgr. = Königreich (Regno).
Kom. = Komitat (Comitato).
Kr. = Kreis (Circondario).
Krhpt = Kreishauptmannschaft (Capitaneria circondariale).
Ld = Land (Paese).
Ldsch. = Landschaft (Regione).
MB. = Meerbusen (Golfo, Baia).
Mt = Monte, Mount, Mountains.
O. = Ort (luogo, località).
P. = Paß (Passo).
Prov. = Provinz (Provincia).
Q. = Quelle (Sorgente, Fonte).
Rep. = Republik (Repubblica).
Rgbz. = Regierungsbezirk (Distretto di governo).
Ru. = Ruine (Rovine).
Terr. = Territorium (Territorio).
U. St. = Stati Uniti.
V. = Volk, Volksstamm (Popolo, Stirpe).
Wil. = Wilajet (Vilajet).

Para encontrar mas facilmente un nombre, se hace referencia en este índice á los trapecios formados por los meridianos y paralelos los cuales están marcados en los márgenes de los mapas con mayúsculas y cifras. Las cifras juntas á los nombres, denotan la página del atlas; las letras y cifras que les siguen, indican el trapecio que contiene el nombre respectivo. Los dos hemisferios de la tabla 3, de los cuales se han tomado las profundidades del mar, están designados por ⓐ y ⓑ; en los mapas de los polos ártico y antártico (Nos 5 y 6) se refiere á las filas de trapecios formadas por los meridianos y están indicadas con cifras solamente. Las señales ⓐ, ⓑ, ⓒ etc. se refieren á los mapas suplementarios. En los mapas suplementarios de mayor tomaño los trapecios están marcados con letras minúsculas.

El nombre de población, rio etc. no se halla indicado más que una vez en el índice y está tomado del mapa ó mapa suplementario en el cual el objeto está representado en mayor escala. Los nombres de las montañas, paises, mares, rios etc. que se extienden sobre varios mapas ó muchos trapecios de la misma hoja, se han tomado de los mapas generales. Las cifras y letras que por falta de espacio, sirven en algunos mapas para designar provincias, distritos etc. y de las cuales hay una explicación en la misma hoja, están añadidas á los nombres respectivos por la señal =. Los nombres compuestos de varias palabras se encuentran siempre bajo el nombre propio solo y no bajo él de su género — por ejemblo: Monte Rosa, bajo Rosa; Rio Negro bajo Negro. Los nombres compuestos con Saint, Sainte, San, Sankt, São, Santa, Santo se encuentran bajo S y tambien bajo el mismo nombre. Los nombres aunque abreviados en los mapas están escritos siempre con todas las letras en el índice. Las abreviaturas que no se comprenden fácilmente, están añadidas á los nombres respectivos con la señal =.

Las letras de las lenguas escandinavas, romanas, eslavas etc. que difieren de los caractéres de los alfabetos alemán y latino — por ejemplo: å, č, ł, ll, ñ, ø, rr, ś, ţ etc. no están puestas como letras particulares, sino aparecen en el órden del alfabeto latino con las letras: a, c, l, n, o, r, s, t, etc. Los nombres escritos con C ó c se deben buscar á veces bajo K ó k y viceversa.

Los nombres que no vayan acompañados de adiciones explicativas, designan siempre sitios (ciudades, pueblos, aldeas etc.); solamente en los sitios, cuyo nombre tiene una significación diferente, por ejemplo: los nombres compuestos con mount = monte, rio etc. y con los nombres terminados en: berg = monte, feld = campo etc., está añadido siempre la señal explicativa *O.* = Ort (sitio, lugar). Los nombres semejantes é iguales que se encuentran varias veces, están provistos siempre de una adición entre paréntesis que determina (según el pais, la provincia, el rio, la montaña etc.) la situación del objeto en cuestion. En este sentido la situación de los rios está precisada generalmente por la indicación de los rios, en los cuales desembocan. Como adiciones explicativas se han empleado las abreviaturas signientes:

a. = an (á, en, sobre).
b. = bei (junto á, cerca de, por).
i. = in (en, á dentro).
v. = von (de, desde).
z. = zu (á, en).
Bez. = Bezirk (distrito)
Bg = Berg (monte).
Bge = Berge (montes, montaña).
Bk = Bank (banco, banco de arena, bajo).
Br. = Brunnen (fuente, pozo).
Bzhpt = Bezirkshauptmannschaft (capitanía de distrito).
C. = Cap (cabo).
Col. = Colonie (colonia).
Ct. = Canton (cantón).
Cty = County (condado).
Dép. = Département (departamento).
Dist. = Distrikt (distrito).
Dj. = Djebel (monte, montaña).
Fl. = Fluß (rio).
Ft = Fort (fuerte, fortín).
Ftm = Fürstentum (principado).
G. = Golf (golfo).
Geb. = Gebirge (montaña).
Ghztm = Großherzogtum (granducado).
Gouv. = Gouvernement (gobierno).
Gfsch = Grafschaft (condado).
Halb-I. = Halbinsel (península)
Hztm = Herzogtum (ducado).
I. = Insel (isla).
In = Inseln (islas).
Kgr. = Königreich (reino).
Kom. = Komitat (comitato).
Kr. = Kreis (círculo, distrito).
Krhpt = Kreishauptmannschaft (capitanía de círculo).
Ld = Land (pais).
Ldsch. = Landschaft (pais, provincia).
MB. = Meerbusen (golfo, seno, bahía).
Mt = Monte, Mount, Mountains.
O. = Ort (sitio, pueblo, aldea, lugar).
P. = Paß (paso, desfiladero, garganta de montaña).
Prov. = Provinz (provincia).
Q. = Quelle (fuente, nacimiento de agua)
Rep. = Republik (república).
Rgbz. = Regierungsbezirk (distrito de gobierno).
Ru. = Ruine (ruina).
Terr. = Territorium (territorio).
U. St. = Vereinigte Staaten (Estados Unidos de América).
V. — Volk (pueblo, nación, tribu).
Wil. = Wilajet (vilaget).

Para facilitar a procura dos nomes nós indicamos no presente indice os quadrilateros formados pelos meridianos e parallelos que são designados na margem da carta por lettras maiusculas e numeros. O numero logo a seguir ao nome indica a folha do atlas; as lettras e numeros restantes referem-se aos quadrilateros em que o nome se encontra. Os dois hemispherios (folha 3) que contêm os nomes das profundidades dos mares, são designados pelos signaes ⓐ e ⓑ. Para as cartas do polo Norte e polo Sul (nos 5 e 6) o indice refere-se ás filas de quadrilateros limitadas pelos graus de longitude e marcadas somente com um algarismo. Os signaes ⓐ, ⓑ, ⓒ, etc. designam as cartas supplementares, nas maiores das quaes os quadrilateros estão marcados com lettras maiusculas.

Cada nome de logar, rio, etc. só figura uma unica vez no indice e a designação refere-se á carta principal ou supplementar, na qual o objecto respectivo é representado em maior escala. Somente as indicações que acompanham os nomes de grandes cordilheiras, grandes paizes, mares, rios, etc. que se estendem sobre diversas cartas ou sobre um grande numero de quadrilateros da mesma carta, se referem ás cartas geraes. Os numeros e lettras que, por falta de espaço, indicam em algumas cartas, provincias, districtos, etc. e cuja explicação é dada n'essas proprias cartas, estão juntos ao respectivo nome pelo signal =. Os nomes compostos de muitas palavras encontram-se no indice segundo o nome proprio e não segundo o appellativo, por exemplo, não se encontra Monte Rosa nem Rio Negro, mas sim Rosa e Negro. Os nomes compostos com Saint, Sainte, San, Sankt, São, Santa, Santo, encontram-se na lettra S e tambem conforme a inicial do nome propriamente dito. No indice todos os nomes estão escriptos com todas as lettras, por isso mesmo que as suas terminações estão abreviadas no atlas. As abreviações que não são facilmente intelligiveis, estão juntas ao nome pelo signal =.

As lettras das linguas scandinavicas, romanicas, slavas e outras que differem dos alphabetos allemão e latinos, por exemplo: å, č, ł, ll, ñ, ø, rr, š, ţ, etc., não foram inseridas no indice como lettras particulares, mas segundo a ordem do alphabeto latino junto das lettras, a, c, l, n, o, r, s, t, etc. Os nomes escriptos com C ou c devem ser eventualmente procurados com K ou k e vice-versa.

Os nomes que não são acompanhados de addição explicativa, designam sempre logares (cidades, villas, communas, seribas, Kraals, etc.). Só se juntou o signal explicativo *O.* = Ort (logar) aos logares cujo nome tem uma significação differente (como por exemplo os compostos com Monte, Rio etc. e os terminados em »berg« = monte ou »feld« = campo, etc.). Os nomes conformes e semelhantes, que se apresentam mais de uma vez, são sempre acompanhados d'uma addição entre parenthesis que fixa (conforme o paiz, provincia, rio ou montanha) a situação do respectivo objecto. N'este sentido a situação dos rios está geralmente fixada pelos nomes dos rios de que elles são affluentes. Como addições explicativas foram empregadas as seguintes abreviaturas:

a. = an (sobre, em).
b. = bei (perto de).
i. = in (em, no, na).
v. = von (de).
z. = zu (em, de).
Bez. = Bezirk (districto).

Ten einde het vinden van een naam gemakkelijk te maken wordt in deze naamlijst verwezen naar de trapeziums, welke gevormd worden door de lengte- en breedtegraden, en welke op den rand van ieder kaart door hoofdletters en getallen zijn aangewezen. De getallen, welke achter den naam in de naamlijst staan, verwijzen naar het blad van de atlas, terwijl de letters en hieropvolgende getallen het trapezium aanwijzen, waarin de bedoelde naam voorkomt. De beide halfronden (blad 3), waarop de namen der zeediepten voorkomen, worden aangewezen door ⓐ en ⓑ; bij de kaarten van de Noord- en Zuidpool (Nr. 5 en 6) wordt alleen verwezen naar de trapeziums gevormd door de lengtegraden, welke dan slechts door getallen nader zijn aangeduid. De teekens ⓐ, ⓑ, ⓒ enz. verwijzen naar de bijkaarten. Op groote bijkaarten zijn de trapeziums door kleine letters aangegeven.

De naam van een plaats, rivier enz. is in de naamlijst slechts eenmaal vermeld en dan wordt verwezen naar die kaart of bijkaart, waarop de gezochte naam op de grootste schaal voorkomt; voor namen van groote gebergten, landen, zeeën, rivieren enz., welke verdeeld zijn over meer dan eén kaart of over meerdere trapeziums eener zelfde kaart, wordt verwezen naar de overzichtskaarten. Cijfers en letters, door welke op sommige kaarten, uit gebrek aan ruimte, provinciën, districten enz. worden aangegeven, en waarvoor de verklaring op het blad zelf wordt gevonden, zijn door het teeken = met den bedoelden naam verbonden. Namen, welke uit meer dan eén woord bestaan, zijn vermeld onder den eigennaam, niet onder den soortnaam — b. v. Monte Rosa onder Rosa, Rio Negro onder Negro. De met Saint, Sainte, San, Sankt, São, Santa, Santo samengestelde namen, worden genoemd onder S zoowel als onder het tweede gedeelte van den naam. De namen zijn, ook al komen zij in de atlas verkort voor, in de naamlijst steeds voluit geschreven; moeielijk te begrijpen afkortingen zijn door het teeken = met den bedoelden naam verbonden.

De letters van de Skandinavische, Rumeensche, Slavische en andere talen, welke met die van het Duitsche of Latijnsche alphabet verschillen, zijn niet als afzonderlijke letters aangegeven, maar staan in de volgorde van het Latijnsche alphabet, zoodat b. v. de letters å, č, ł, ll, ñ, ø, rr, š, ţ enz. overeenkomen met de letters a, c, l, n, o, r, s, t enz. Namen, welke beginnen met C of waarin een c voorkomt, kan men soms vinden bij K of k of wel omgekeerd.

Namen, waarbij geen nadere verklaring voorkomt, geven steeds plaatsen aan (steden, dorpen, gemeenten, seribas, kraals, nederzettingen enz.); slechts bij plaatsen, wier naam een andere beteekenis heeft, zooals b. v. het geval is bij samenstellingen met Mount = Berg, Rio = Rivier, enz., is tot nadere verklaring steeds een O = Ort (plaats) gevoegd. Bij meer dan eenmal voorkomende namen heeft men steeds, tusschen haakjes, een nadere verklaring gegeven van het land, de provincie, rivier, berg, waarin of waarbij de bedoelde plaats gelegen is; bij overeenkomstige namen van rivieren is gewoonlijk de naam van de hoofdrivier, waarin de rivier uitloopt tot meerdere duidelijkheid opgegeven. Voor verklaring der verkortingen kan het volgende dienen:

a. = an (aan, aan de)
b. = bei (bij, bij de).
i. = in (in).
v. = von, vom (van, van de).
z. = zu (te).
Bez. = Bezirk (district).
Bg = Berg.
Bge = Berge (Bergen).
Bk = Bank, Sandbank.
Bzhpt = Bezirkshauptmannschaft (district).
C. = Cap (kaap).

Wil. = Wilajet (vilayet).

För att underlätta tillrättafinnandet af ett namn hänvisas i detta register till de å hvarje kartblad befintliga, af gradnätet bildade rutor, hvilka vid sidorna till hvarje karta utmärkas genom stora bokstäfver och siffror. De närmast efter namnen förekommende siffrorna beteckna de olika kartbladen; bokstäfverna och de efter dessa följande siffrorna beteckna den ruta, som innehåller namnet i fråga. De båda halfkloten å bladet No. 3, från hvilka namnen på hafsdjupen äro hämtade, betecknas med ⓐ och ⓑ; beträffande kartorna öfver Nord- och Sydpolen (Nr. 5 och 6) hänvisas till de af längdgraderna bildade rutor, hvilka närmast betecknas allenast genom siffror. Tecknen ⓐ, ⓑ, ⓒ o. s. v. utmärka bikartorna. Å de större af dessa äro rutorna betecknade genom små bokstäfver.

Hvarje namn på en ort, en flod o. s. v. upptages i registret endast en gång, och i regeln hänvisar namnet till den hufvud-eller bikarta, där ifrågavarande ort, flod o. s. v. förekommer i den största skalan; namnen på större berg, länder, haf, floder o. s. v., hvilka upptaga flera kartor eller sträcka sig öfver många rutor på ett och samma kartblad, äro hämtade från öfversiktskartorna. Siffror och bokstäfver, genom hvilka å somliga kartor — af utrymmesskäl — provinser, smärre områden o. s. v. betecknas och öfver hvilka förklaring lämnats å vederbörligt kartblad, ha medelst tecknet = tillagts namnen på ifrågavaranda provinser, smärre områden o. s. v. Namn, som bestå af flera ord, ha upptagits under egennamnet, icke under artnamnet, t. ex. Monte Rosa under Rosa, Rio Negro under Negro. Med Saint, Sainte, San, Sankt, São, Santa, Santo sammansatta namn upptagas såväl under S som under själfva namnet. Alla namn äro i registret fullständigt utskrifna, äfven om de å de respektive kartorna förekomma med förkortade ändelser; mera svårfattliga förkortningar ha medelst tecknet = bifogats de motsvarande, fullt utskrifna namnen.

De från tyska och latinska alfabetet afvikande bokstäfverna inom nordiska, romanska, slaviska m. fl. språk, t. ex. å, ä, ö, ø, č, ł, ll, ñ, rr, š, ţ u. s. v. äro icke upptagna såsom särskilda bokstäfver, utan ha inordnats i det latinska alfabetets bokstafsföljd vid a, o, c, l, n, r, s, t, o s. v. Namn, som skrifvas med C eller c och icke anträffas under dessa bokstäfver, sökas under K eller k och tvärtom.

Namn, som icke åtföljas af ett förklarande tillägg, betyda alltid orter (städer, byar, kommuner, kraals o. s. v.); endast vid de orter, i hvilkas namn ingår någon sammansättningsdel, som har en afvikande betydelse — såsom t. ex. Mount, Rio m. fl. eller ändelserna berg, feld (= fält) o. s. v. — har alltid förklaringen *O.* = Ort tillfogats. Namn, som förekomma upprepade gånger, ha alltid försetts med ett inom klammer bifogadt tillägg, som närmare (d. v. s. i afseenda å land, provins o. d. eller i förhållande till floder, berg o. s. v.) angifver den ifrågavarande ortens belägenhet; vid floder med samma namn tillägges vanligen såsom särskiljande kännemärke namnet på den hufvudflod, i hvilken de utfalla. Såsom förklaringar användas följande lätt begripliga förkortningar:

a. = an (pä, vid).
b. = bei (vid).
i. = in (in, i).
v. = von (af, från).
z. = zu (till).
Bez. = Bezirk (Område, distrikt)
Bg = Berg (Berg).
